Subject: Research on Real Cost of External Fraud

Dear Colleague,

We are currently conducting research to determine the real cost of dealing with external fraud. This covers frauds perpetrated by contractors, clients/customers and organised fraudsters. We are interested in the additional costs such as the cost of investigation, the costs of other staff involvement in dealing with it, the use of specialist contractors etc.

If you have been involved in the investigation of such a fraud you might be able to help us. We have a survey you can complete at <https://portsmouth.onlinesurveys.ac.uk/the-impacts-and-costs-of-external-fraud> and if you would prefer we would be willing to interview you. Please contact mark.button@port.ac.uk if you could help in this way.

The research has been funded by Synectics Solutions and if you would like to see previous research: [Real Cost of Internal Fraud](#) and [Real Cost of Recruitment Fraud](#) please click on these links.

This type of data is often very useful in building a business case to invest in counter fraud solutions within organisations so hopefully the past and this study will be of use.

We look forward to your participation.
